### Technical Information

Maximum fall height 1,20 m  
 Security zone 28-31,50 m<sup>2</sup>  
 Number of children 17  
 Concrete required  
 No surface fixation available

### Product Description

Playground equipment for the little ones, from 2 to 10 years old, made out of robinia and larch wood. The lumberjacks hut consists out of an elevated play house which can be reached by stepping posts. These stepping posts create a bigger challenger for the older children. The play house has 2 benches and a table on the inside as well as 2 windows so children on the inside can make contact with children on the outside. The windows also make sure parents can still keep an eye on their children. The swing consists out of 4 robinia vertical beams with a diameter of 13 cm and 1 robinia horizontal beam with a diameter of 15 cm. The swing has 2 rubber seats which are attached by means of galvanized chains to maintenance-free, stainless steel swing hooks. On request, the swing can also have 1 or 2 cradle seats. The lumberjacks hut is delivered partly preassembled.
